## Career Objective

I aim to advance my skills in PHP development, particularly with Laravel. With experience in API development, content management, and system bug fixing for enterprise applications, I am confident in contributing to real-world projects and optimizing web development processes. My goal is to enhance my expertise as a backend developer and continuously learn new technologies to deliver effective solutions for businesses.

## Education

**VKU UNIVERSITY** (10/2020 - present)

- Major: Information Technology - Specialized: Digital Arts and Design

**TOEIC COURSE** (6/2023- 2/2024)

- Estimated Score: ~550

## Work Experience

○ **Di4L** (August 2024 - October 2024)

- Technologies used: Laravel, AlpineJS with Livewire.
- Tools: Git, Postman, Nginx.
- Job Description:
  - Developed backend CMS and API for a taxi booking application:
    - Added address functionality for users.
    - Managed posts, categories, and job applications.
    - Implemented discount feature for clients on successful orders.
  - Created sessions and templates for an e-commerce website.
  - Fixed issues in the admin panel for a booking application.

○ **Hotel Company** (June 2024 - July 2024)

- Project: Transport ticket booking website
- Technologies: Laravel, AJAX, jQuery, Bootstrap CSS.
- Tools: Git, Postman.
- Job Description:
  - Developed the "vexere" API to:
    - Search for bus routes.
    - Display bus route information.
    - Filter and sort bus routes.
  - Implement CMS to manage users, blogs.

## Skills

### Programming Languages:

- PHP, JavaScript, CSS, SQL

### Frameworks & Libraries:

- Laravel, Alpine JS, Vue JS
- Bootstrap CSS, Tailwind CSS.

**Tools:** GIT, Postman, Nginx.

### Design Tools:

- Illustrator, Figma.

### Languages:

- English (listening and reading).
